\*Invited Dr Yen to go there to help the rural education and agriculture work. However, Yen was in Chungking at the time and could not make the trip.

- 8. There is no inflation in Szechuan. In fact there is deflation. Production in the whole area has been seriously curtailed due to guerrilla activities. The situation in Szechuan is reported to be serious and Kwangsi guerrillas are also extremely active. Food prices are kept under control and the economy on the whole is stabilized.
- 9. The Communists have not interfered with MEM's work. In fact the men assigned to MEM are hard-working, honest and efficient. Even the highest official took a long inspection tour on foot with members of MEM recently. They receive a rice allowance, housing and a meager salary. The people on the whole generally feel satisfied even if taxes are high because the Communists put the money back into the areas for improvement rather than pocketing it for themselves.
- Objection to Communist rule is "thought control". In fact some of the reports intimated that it was extremely oppressive although there were no details. Maybe this is the price one must pay and sacrifices made for honest and efficient government.
- 11. The Communists and MEM recently held a long conference in Chungking to discuss rural reconstruction and agricultural reform work. A million-word Chinese report has been written, covering the whole 25-year period of mass education and anti-illiteracy work in China.
- 12. Under the Communist influence MEM's work is concentrating more on agricultural and rural reconstruction. Mass education has been temporarily halted for unknown reasons. The text books originally put out by MEM and used extensively in Tinghsien and in Szechuan are now being re-written by the Communists. This is probably the most drastic change.
